### Oneida Township

**PO Box 406**  
**Huntingdon, PA 16652**  
**Phone: 814.643.3116**  
**Fax: 814.643.0524**  
**Hours: M,T,TH 9:30-3:30**

The Oneida Township Supervisors would like to thank those who have complied with disengaging their sump pumps from the sewer system.

It is making a difference in the cost to the township.

## Homeowners Can Take Action to Protect Their Property from Wildfire

Wildfire need not destroy everything in its path. In fact, cleaning your property of debris and maintaining your landscaping are important first steps in helping to minimize damage and loss.

The National Fire Protection Association has developed the following list of actions you can take throughout the year to help reduce the risk of your home and property becoming fuel for a wildfire:

- Clear leaves and other debris from gutters, eaves, porches, and decks. This prevents embers from igniting your home.
- Remove dead vegetation from underneath your deck and within 10 feet of the house.
- Remove anything stored underneath decks or porches.
- Screen or box-in areas below patios and decks with wire mesh to prevent debris and combustible materials from accumulating.
- Remove flammable materials, such as firewood stacks, propane tanks, and dry vegetation, from within 30 feet of your home's foundation and outbuildings, including garages and sheds. If it can catch fire, don't let it touch your house, deck, or porch.
- Wildfire can spread to tree tops. If you have trees on your property, prune them so the lowest branches are 6 to 10 feet from the ground.
- Keep your lawn hydrated and maintained. If it is brown, cut it down to reduce fire intensity. Dry grass and shrubs are fuel for wildfire.
- Don't let debris and lawn cuttings linger. Dispose of these items quickly to reduce fuel for fire.
- Inspect shingles or roof tiles and replace or repair those that are loose or missing to prevent ember penetration. • Cover exterior attic vents with metal wire mesh no larger than 1/8 inch to prevent sparks from entering the home.
- Enclose under-eave and soffit vents or screen them with metal mesh to prevent embers from entering.

Learn more about how to keep your family safe and reduce your home's risk for wildfire damage at [www.firewise.org](http://www.firewise.org)

## UPDATE ON KYPER ROAD REPAIR

Oneida Township Supervisors have been working diligently to try and make Kyper Road less likely to flood during heavy rains.

It was hoped that FEMA funds would be available to help accomplish this. But the county was turned down for FEMA funds.

The Township is working with Levine Engineering to come up with a suitable solution. A new culvert has been purchased and studies are being done on the best way to use it. The old culvert will need to be cleaned out and the stone hauled away.

The Supervisors are wanting to see this project completed before another heavy rain comes our way.

Liquid Fuels money can only be used for the repair work that was done right after the storm in June. Replacing the culvert will be done using General Fund money.

Kyper Road was scheduled for repaving as our road project through Liquid Fuels. New Enterprise Stone & Lime Co., was the winning bid for this project but, because of the new damage that occurred before that work could be started, the repaving had to be put on hold.
